 Lagos, Nigeria

skills

- **Automation:** Bash, Python
- **Containers:** Docker, Docker Compose
- **Web & Proxy:** NGINX
- **Networking:** Linux Networking, iptables, NAT.
- **Observability:** Log monitoring, Slack Alerts
- **Version Control:** Git/Github
- **Cloud Tools:** VPS Provision, SSH, AWS, MS Azure
- **Hardware:** Repairs and Installation

Education

B.Sc (Ed): Political Science

Lagos State University

2016 - 2020

Language

- English

Erharuyi Godwin

DevOps Engineer

Experience

DevOps Intern

HNG

2025 - Present

Expert - Linux virtual Private Cloud (VPC)

- Built a VPC using network namespaces, bridges and iptables.
- Created the "vpcctl" CLI tool for automating subnet created, NAT gateways and firewall rules.

Expert - Observability & Alerts (Blue/Green)

- Implemented custom Nginx logging and a Python log watcher for real-time Slack alerts.
- Monitored failover events and high 5xx error rates to improve operational visibility.

Expert - Blue/Green Deployment with Failover

- Developed a Blue/Green deployment strategy using Docker Compose and Nginx upstream.
- Established automated failover logic based on health checks for better service availability.

Expert - Automated Deployment Bash Script

- Created and idempotent Bash Script ("deploy.sh") for automating Dockerized app deployments on remote servers.
- Handled SSH, container management and Nginx proxy configuration for CI/CD automation.

Expert - NGINX Web Server Deployment

- Successfully provisioned and configured a live NGINX web server on a cloud platform, demonstrating foundational skills in server setup and accessibility through GitHub workflow.

ICT OFFICER

Wellzino Communication

2022 - 2024

- Implement Systems Updates improving performance by 15%.
- Trained Junior Staffs to maximize team efficiency.
- Deployed new Antivirus Software securing 50+ endpoints.
- Troubleshoot over 80% of Computer problem at first attempt.
