

ERHARUYI, Godwin Lucky

Junior DevOps & Cloud Infrastructural Engineer

07049209767 | godwinerharuyi@gmail.com | www.linkedin.com/in/erharuyi996

Lagos Nigeria

Professional Summary

DevOps and Platform Engineer with hands-on experience designing and implementing production-grade infrastructure systems, including cloud networking, containerized micro-services, CI/CD pipelines, observability systems, and security automation. Skilled in Linux systems, Docker, CI/CD automation, and real-time monitoring. Proven ability to build infrastructure tools, not just use them.

Technical Skills

- **Automation:** Bash, Python
- **Containers:** Docker, Kubernetes
- **Monitoring:** Grafana, Prometheus, ELK Stack
- **Networking:** Linux Networking, iptables, NAT.
- **Version Control:** Git/Github
- **Cloud Tools:** AWS, MS Azure
- **Operating system:** Windows, Linux
- **Hardware:** Repairs and Installation
- **Prior – Frontend:** HTML, CSS JavaScript (React)

Experience

Internship| HNGi14 DevOps Engineer Intern

|Apr 2026 - June 2026

Real-Time Anomaly Detection & DDoS Protection Engine

- Designed real-time traffic monitoring with sliding windows and statistical baselines. Implemented IP blocking, Slack alerts, and auto-unban logic.

Containerized Microservices Platform with CI/CD Pipeline

- Containerized multi-service app and built GitHub Actions pipeline with testing, security scanning (Trivy), and rolling deployments.

SwiftDeploy – Declarative Infrastructure Automation CLI

- Built IaC tool generating Docker Compose and Nginx configs from YAML. Added canary deployments, validation, and lifecycle automation.

Internship| HNGi13 DevOps Engineer Intern

|Oct 2025 - Dec 2025

Virtual Private Cloud (VPC) Simulation Platform

- Built a Linux-based virtual cloud network using namespaces, bridges, and iptables. Implemented VPC isolation, routing, NAT, and a CLI automation tool.

Observability & Alerting System for Blue/Green Deployments

- Created log-watcher for failover detection and error-rate monitoring. Integrated Slack alerts and cooldown-based incident management.
- Implemented alert deduplication and cooldown system to prevent alert fatigue.

Automated Deployment Bash Script (Remote DevOps Automation)

- Built Bash-based deployment automation for remote servers with SSH, Docker setup, Nginx proxy config, and idempotent deployments.

ICT Officer| Wellzino Communication |Feb 2022 - Jan 2024

Key Responsibilities:

- Installed, configured and maintained computer systems, including desktops, laptops, printers, and peripheral devices to ensure smooth daily operations.
- Troubleshoot operating systems and applications (Windows, basic Linux, MS Office, browsers) to minimize downtime and improve user productivity.
- Performed routine system maintenance and updates, including software patches, antivirus updates, and system backups.
- Ensured compliance with IT policies and security standards, helping to protect systems from malware, data loss, and unauthorized access.

Career Projects

- ◆ *Building a DDoS Detection Tool:*
<https://github.com/Godwin-Techie/DDOS-Detection-Tool>
- ◆ *Building a Full-Stack DevOps System with CI/CD, Docker, Redis, and GitHub Actions:* <https://github.com/Godwin-Techie/GitActions-CI-CD>
- ◆ *SwiftDeploy -A Policy-Gated Canary Deployment Tool:*
<https://github.com/Godwin-Techie/SwiftDeploy>
- ◆ *DevOps Sandbox:* <https://github.com/Godwin-Techie/devops-sandbox>
- ◆ *Linux VPC CLI:* <https://github.com/Godwin-Techie/Linux-VPC>
- ◆ *Frontend Mentor Challenge : Launch Countdown Timer --*

- ◆ *Frontend Mentor Challenge : Landing page for Ping --* <https://ping-comingsoonpage.netlify.app/>

Education

B.Sc (Ed): Political Science – Lagos State University
October 2016 – September 2021

Certifications

- Introduction to Microsoft Azure Cloud Services Certificate - Coursera, 2025
- Microsoft Azure Administrator (AZ-104) Certificate - Cousera 2025
- Introduction to DevOps Certificate - Cousera 2025
- Introduction to Cloud Computing - Cousera 2025
- Utis Hardware Computer Training School - 2014
